## Martlesham Primary Academy Sensory Garden

Dear Parents, Carers and Grandparents,

We are planning an exciting new project to complete a sensory garden on the school grounds for all of the children to use. The majority of this garden will be built from recycled materials and donations, and the work will be completed by Mr Francis.

This project is due to start on Monday 27<sup>th</sup> January, which will involve clearing the area identified then over the following weeks, planning the layout of the garden by planting trees and greenery.

Could you help? Do you have expertise in garden design or CAD design? Any contacts at local garden centres for donations? Contacts at local businesses that would like to support us? Are you green fingered and wish to help with some planting?

If none of these are you, but you still wish to be involved, please speak to Mr Francis who will gladly discuss any plans and how you could still help and be involved. There

will be soil that needs moving, fences need removing and some erecting, and raised beds to be built.

If you feel you are able to help in any way, please contact the office or Mr Francis.

Kind Regards,

Miss Churchman
