Newsletter

Issue 2 – December 2022 – Merry Christmas!

Christmas is nearly here!

This week in Eco Council as it was our last week before Christmas, we wanted to do something special. We decided to try and make an Eco Christmas Tree. We made the trunk with cardboard tubes that some school posters arrived in and covered this with tissue paper. We then trimmed the over-hanging branches from our fir tree and stuck these into holes that we made in the tubes. To make baubles we cut the bottoms from drink bottles (these look almost like snowflake shapes) and painted them. Lastly we made a paper star for the top. Our Eco tree is, we believe, 100% recyclable which is what we were aiming for.

Eco Murals

Our Eco murals are near complete. The children have worked incredibly hard on these and they look amazing! We will share pictures in our next newsletter after Christmas.

Our Eco Christmas Tree

Autumn Litter Collection

At the end of November we all braved the cold (Miss Churchman included) and did a litter collection in the local community. It was encouraging that there wasn't huge amounts of litter in the area but any is too much! Litter included more than anything else Monster energy drink cans.

Finally....
Have an amazing Christmas and remember
Recycle Recycle Recycle!
