## Maths

This term, Year 5 develop their knowledge and understanding of shape, position and direction, negative numbers and converting units. Year 6 children will develop their knowledge and understanding of angles in different shapes, position and direction and

## History

This theme will be full of History! After learning about wars across history that Britain has been involved in, they will learn about the causes of WW2, considering the impact on everyday life for civilians. They will also consider the significance of technology in WW2 as well as different leaders' decisions. They will decide whether the Battle of Britain was a turning point and explore the involvement of Martlesham Airfield in WW2.

## Design and Technology

Make Do and Mend! The children will develop their sewing skills to recycle and repurpose old clothes and materials, just as they did during World War 2.

## Art and Design

Across the term, the children will learn about abstract art and Orphism, creating a final piece inspired by music. They will also develop their sketchbook use, observational drawing and mixed media collage.

## Computing

The children will continue to develop their programming skills, creating a computer game on Kodu. They will also learn how to use 3D modelling tools to create graphic models.

## Music

The children will continue to develop their improvisation skills, exploring the freedom this brings. They will also develop their performance skills using their own choice of music.

## French

The children will be learning about school, including different subjects as well as providing their own opinions. They will also learn about other countries in the world that speak French.

## RE

The children will be studying aspects of Christianity, considering the significance of the 'Eucharist' to Christians, and Buddhism, considering how Buddhists believe they can find enlightenment, this term.
